Pursuit of Renewable Energy : for Prevention of Global Warming

Photovoltaic Power Generation Business

We've accumulated our expertise of photovoltaic power generation business in Japan and are evolving our track record from Japan to Southeast Asia, including Vietnam, Laos, Nepal, etc. Our expertise of photovoltaic power generation covers residential use to large scale MW power plants.

Development Business

We can take risk of development in various stages of the power plants. We can develop the plants from the scratch, acquisition of FIT right or land, and are ready to transfer projects at any stage of value-chain to investors.

EPC(Engineering, Procurement, & Construction) Business

We can provide EPC services with any type of project. We cover land remediation work and transmission lines and sub-stations in addition to installation and wiring of mounting frames and modules.

IPP (Independent Power Producer) Business

We can invest our own capital as well as raise fund of the third-party money for "buy & hold" of the plants as IPP.

O&M (Operation & Maintenance) Business

We can also provide various types of O&M services in accordance with customers' request.

Industrial Training & Internship Program

Daisun Vietnam do provide high quality design and construction services as well as one-stop-solution of project management based on our industrial training program at a training center in Vietnam and technical internship program in Japan including;

- ▶ Japanese practices of project management, design, and construction
- ▶ Japanese language and global mind-set
- ▶ Qualification obtaining support program

Expertise in Civil & Construction Work

Engineers and site-workers of Daisun Vietnam have acquired and held state-of-the-art construction technology and expertise, which are one of core business called Diamond Void-slab (with patent right) at the parent company in Japan. We, therefore, can flexibly respond to various needs of customers.
